## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 3, drawn to a cover sheet package, classified in class 428, subclass 40.1.
  - II. Claims 4 - 9, drawn to a method of manufacturing a cover sheet package, classified in class 156, subclass 60.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II, claims 4 - 9 and Group I, claims 1 – 3 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process such as extruding the resin film and the peeling sheet together before forming the punched opening..
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Darryl Mexic on February 23, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1772

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
